Problem Statement	Quality of Life for Each Country	World Cost of Living & QoL 2024-2025	NHS Virtual Ward/ Remote Patient Monitoring	NHS RTT Waiting times Workforce Headcount May 2025 Referral to Treatment Waiting Times	Global AI Tool Adoption Across Industries
Dataset use cases or Problem to solve	Comparative analysis of quality-of-life indicators across countries. Data visualization and storytelling for social, economic, or environmental trends. Statistical modeling or machine learning projects on global living conditions.	Cross-country and city-level comparisons 📊 Exploratory data analysis (EDA) and storytelling 📌 Trend analysis between 2024 and 2025			Analyze adoption rates of popular AI tools across regions and sectors. Study user demographics and company profiles influencing AI integration. Explore textual user feedback for sentiment and topic modeling. Perform time series analysis on AI adoption trends from 2023 to 2025. Benchmark industries, countries, and company sizes for AI readiness.
Data source(s) - Public Data (NHS England, gov.uk), synthetic Open data from Kaggle/Numbeo		Synthetically generated, obtained from I Anonymised data, using existing resources		NHS England https://www.england.nhs.uk/rtt/	Try with Python Pandas
Tools used (SQL, Python, Power BI, R)					
Methodology:					
Data cleaning steps		Added two countries to represent Africa as a continent			
Analytical techniques (regression, forecasting, segmentation)		Converted the prices in USD to GBP			
Visualisation	Cleaned by removing unnecessary text delimiters, ensuring column data types are fit for purpose	Ensure data types are a good fit for required charts
