Virtual Ward Dashboard

Reporting Rules

Page ▲	Description
Caseload	Number of patients occupying the Virtual Ward daily based on the current capacity of 29. The charts show values for the year till date and can be filtered by month and service offered
Contacts	Year to date contacts done by the service by contact type, contact method and clinician
Data Source	Anonymised and synthetically generated dataset
Occupancy	Year to date overview of patients discharged excluding those with discharge intervention - 'Duplicate referral', 'No capacity to respond', 'Not Medically Fit for Discharge', 'Referral withdrawn', 'Unable to contact'
Referrals	Year to date referrals to unit including breakdown by age, gender and diagnosis
Remote Monitoring	Captures all unique instances of patient remote monitoring; to know how many patients have used the questionnaire Remote monitoring is determined using the Frailty & Respiratory Observations questionnaire
SITREP	Snapshot containing summary of admissions over 14 days up to 8am on Thursday prior to week of submission from the Virtual Ward unit.
